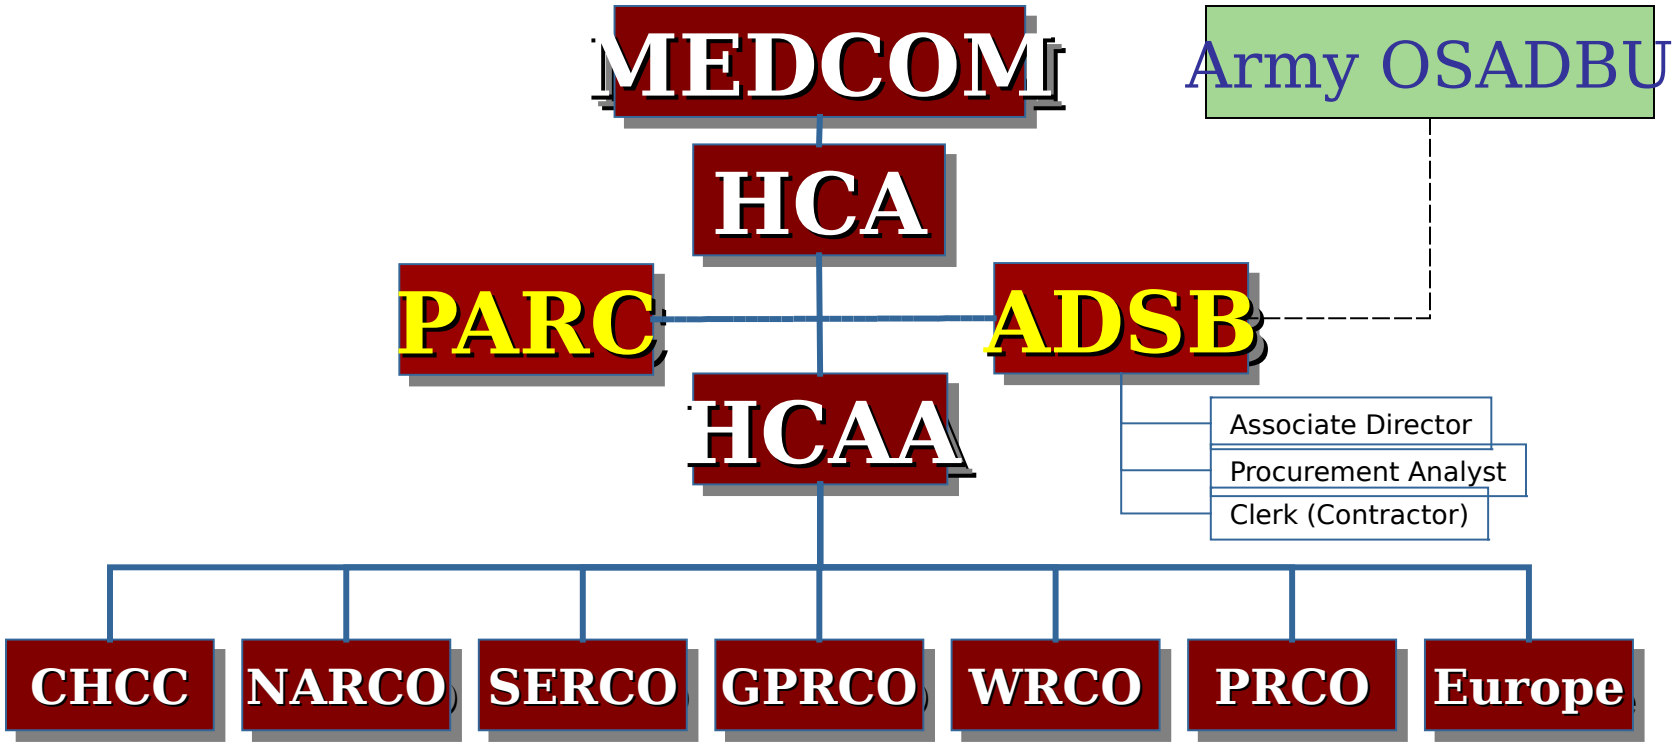
Organization Chart



Mission

Our mission is to champion small business interests in the U.S. Army Medical Command's health care acquisition process.

We do this by

- Providing training, assistance and counseling to the small business community about doing business with the Army Medical Command.
- Providing training, assistance and counseling to our internal customers about contracting with small businesses.
- Assisting internal customers in identifying small business resources to meet their needs.
- Conducting outreach and match-making events.

We are also the Medical Command’s primary liaison with the Small Business Administration for health care acquisitions.
